- Isolating Valve, so that the Injection Valve can be Easily Serviced/Replaced Without Process Water Shutdown
- 0.5 mtr of 6mm SS Pipe to Dissipate the Heat
- Adaptor to 6mm Flexible Tubing

Models:

Model	Description
HOTINJSET	For injecting chemicals into hot pipelines or tanks

EMEC has advised that their PVDF injection valves supplied standard with K, V and A series pumps are suitable for use at up to 85°C at 18 bar, or up to 130°C at 5 bar.

Our recommendation allowing for a margin of safety, is to use a hot injection set in any installation with the potential to operate at above 100°C and for any installation operating above 85°C under pressure.
